

## COMMISSIONING OF CONTROL SYSTEMS FOR ELECTRIC GENERATORS

Meeting objectives in our company is part of the philosophy that frames the dedication and professionalism of our group of engineers.

Once again, Sepac takes on a new challenge by installing 2 control systems for electric generators in just 18 days and 10,000 km from Mexico, at the San Isidro Plant, Valparaíso, Chile, owned by the Italian company ENEL.

The disassembly and assembly of the new equipment was carried out, as well as the commissioning of 2 integral control systems for the 2 combined cycle units of 250 MW and 100 MW of the Mitsubishi brand.

SEPAC reaffirms its presence in the national market as a foreigner with cutting-edge technologies where we confirm the goodness of Mexican engineering in the sector of global generator excitation and control systems involving:

**EXCITATION SYSTEMS**

**SYNCHRONIZATION SYSTEMS**

**PROTECTION SCHEMES**

**DISTRIBUTED UNIT CONTROLS**

**CONTROL ROOM MODERNIZATION**

January 2019
