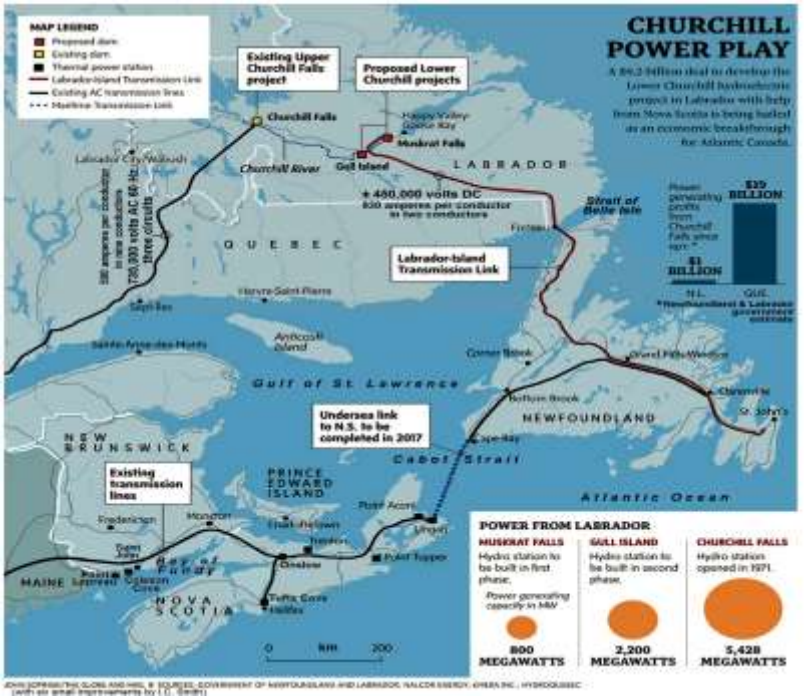
SEPAC Corp.

PREQUALIFICATION OF SEPAC IN CHURCHILL FALLS

SEPAC in consortium with the American company L & S Electric, has enter the bidding for the project of modernization of the hydroelectric power from Churchill Falls -Labrador, Canada.

The Consortium SEPAC / L & S Electric has achieved the prequalification and is among the finalists proposals to be considered for the award of the project. SEPAC is consolidated as a provider of proven solutions for the hydroelectric industry, by being selected as project partner by L & S Electric for the design and supply of two excitation system for generators of 500 MW of Churchill Falls, and in the possibility to intervene in the 9 remaining units.



SEPAC, as a member of the Consortium, was invited to the offices of NALCOR in St. Johns, New Foundlands, to present to Churchill Falls specialists the preliminary draft, clarify the scope of the supply and discuss technical aspects of its offer. Topics such as warranties, after-sales services, and specific concerns were presented and answered in satisfaction to NALCOR engineering staff. The final report will be released in the upcoming weeks and therefore announced the award of the contract to the winning company. As a result, SEPAC confirms its willingness to extend its presence not only in Latin America, but anywhere in the world.
